SUMMARY

As a software developer with 3 years of experience, I am passionate about leveraging AI, NLP, Data Analysis and machine learning to build intelligent, efficient systems. I have developed E-Learning platforms and survey-based applications and completed internships in data analysis. My goal is to tackle complex challenges within a collaborative team, integrating AI and ML technologies to enhance user experiences and streamline solutions.

EDUCATION

University of New Haven (UNH) – Tagliatela College of Engineering

West Haven, CT

Masters in Data Science | Awarded Scholarship | GPA: 4.0 / 4.00

Aug 2024 - May 2026

Coursework: Introduction to Programming (Python), Math for Data Science, Intro to Data Science, Machine Learning, Intro to Artificial Intelligence, Distributed & Scalable Data Engineering, Natural Language Processing, Deep Learning, Computer Vision, Power BI.

Prime College (BIM)

Kathmandu, Nepal

Bachelor's in Information Management | Academic Scholarship | GPA 3.47/4.00

Oct 2017 – Apr 2022

Coursework: Structured Programming, Digital Logic Design, Computer Information System, Data Communication and Networking, Java Programming, Web Programming, Database Management System, Artificial Intelligence (AI), Software Project Management, Data Mining and Warehousing, Object Oriented Analysis.

WORK EXPERIENCE

Youth Innovation Labs, NGO

Kathmandu, Nepal

Software Developer – Mid Level

Nov 2022 – Aug 2024

- Engineered dynamic front-end solutions using ReactJS, Redux, TypeScript and Mapbox-gl, delivering real-time data visualization, multilingual video player and responsive interfaces to enhance user engagement and decision making.
- Contributed to critical platform features for projects like Bipad-portal, NDRRMA, and Shikshya, optimizing data handling, user interaction and overall performance with scalable, maintainable code.

ThemeGrills, (WordPress Based)

Kathmandu, Nepal

Associate Software Developer | Internship

Dec 2021 – Nov 2022

- Enhanced an LMS system by developing key-features, including a custom text editor and an interactive quiz section, improving user engagement and content creation.
- Built dynamic front-end components using React and Typescript, delivering a responsive and feature-rich e-learning platform.

GrowByData

Kathmandu, Nepal

Data Cloud Internship

Nov 2019 – Dec 2021

- Worked on Data Migration, Data Quality Assurance.

ACADEMIC PROJECTS

Predictive Models

- Implemented a Feedforward Neural Network in PyTorch for binary diabetes classification, utilizing 8 input features, ReLU activation hidden layers with optimizing functions.
- Implemented advanced data preprocessing techniques, including data cleaning and normalization, and employed CrossEntropyLoss for reliable performance evaluation in predictive modeling with an accuracy of 83%. Periodic evaluations were made on a separate test set to monitor the models performance. [| GitHub |](#)

Deep Learning Models (NLP)

- Computer Vision: Developed and deployed a CNN model using TensorFlow to classify various plant disease with high accuracy. The model achieved a training accuracy of 93% by leveraging more than 100,000 labeled images and employing advanced techniques such as data augmentation, caching and rescaling. Also, integrated Flask API for backend functionality and React in Frontend for seamless interaction.

Generative Models [| GitHub |](#)

- Built a text to text generation with custom data using GPT-2 LLM model in Hugging face using a custom tokenization function by including special token (eos_token). Customized the pipeline and fine-tuning to align with specific requirements.

SKILLS

Languages/Libraries

Python (Pandas, Numpy, NLTK, PyTorch, TensorFlow, Matplotlib), SQL, JavaScript, Typescript.

Frameworks / Technologies

ReactJS, NextJS, React Native, NodeJS, Photoshop, Canvas, Lightroom, Git/GitHub, GitLab.
