SUMMARY

As a software developer, I am deeply fascinated by the potential of data analysis, artificial intelligence, and machine learning on the field of software's. I have a strong desire to apply my skills within a large development team, eagerly tackling complex problems and consistently seeking ways to enhance user efficiency. Aspiring to learn about Data Analysis, Machine Learning and AI and develop modern systems that seamlessly integrate these technologies, creating intelligent and efficient solutions. I have 3 years of experience in the field of software development working in applications such as E-Learning platforms and other survey based applications and have done some internships in the field of data analysis. Additionally, I have a passion for fitness and regularly engage in gym activities to maintain a balanced lifestyle. I am also committed to social work, aiming to contribute positively to the community whenever possible.

EMPLOYEMENT EXPERIENCE

Youth Innovation Labs (NGO)

Kathmandu, Nepal

Mid-Software Developer

Nov 2022 – Jul 2024

- Developed real-time data charts and interactive map-based functionalities using ReactJS, enhancing user decision-making and data analysis.
- Created custom video players with real-time subtitles, adaptive streaming, and multilingual support, as well as real-time chat and notification systems to improve user engagement.
- Focused on responsive design and modern UI/UX best practices to ensure a seamless and engaging user experience across different devices and platforms.
- Applied ReactJS, Redux, Mapboxgl, TypeScript, React-Query and other modern technologies to build scalable, high-performance front-end solutions, ensuring robust and maintainable code.
- Played a key role in developing and optimizing critical features for platforms like Bipad-Portal, NDRRMA, Shikshya, Tag Me, impacting user interaction, data handling, and overall platform functionality.

Themegrills (WordPress Based Company)

Kathmandu, Nepal

Associate Software Developer

Feb 2022 - Nov 2022

- Contributed to the Plugin, an LMS system extension, by integrating and optimizing key features to enhance the platform's functionality.
- Developed the front-end section using technologies such as React and Typescript, contributing to a dynamic and interactive e-learning platform.
- Led the development of the quiz section, enhancing user engagement through interactive and responsive design.
- Created a custom text editor that provides a rich and flexible content creation experience for users.
